

DORICO TECHNOLOGIES SRL manufactures and markets machines, diamond abrasive products, polishers and detergents for the sector of Cleaning and Grinding, all strictly made in Italy.

With our careful industrial and commercial organization we are able to offer a wide range of products suitable for any need.

We invest constantly in research and innovation, aimed to improve the quality of products, the speed of response to market requests, competitiveness and services.

With over 20 years of experience we are able to give our customers various solutions and offer personalized services.

Every need is an opportunity for us to demonstrate a solid set of skills and make use of a vast heritage of resources.

Behind the quality of our products lives and works a proudly Italian company that makes use of technicians and professionals serious and competent.

The analysis of the materials, the technical solutions and the possibility of studying customized productions make us an authentic partner-producer for the sector of Grinding.

We offer high-level skills and know-how over a wide range of products.

At the basis of innovation is the comparison with the outside world and the drive for excellence in terms of the quality and performance of its products.

Competence and passion for their work guarantees a relationship of mutual esteem and trust with international interlocutors.

We believe firmly that success is based on the quality of products and services offered to customers.
