Travertino Morelli F. & C. S.r.l., based in Tivoli,
installed a **Gaspari Menotti** polishing line to
polish slabs of the famous Roman Travertine

Travertino Morelli F. & C. S.r.l. Company is part of Morelli Group, which boasts over

30 years of experience in the extraction and processing of Roman Travertine blocks in Guidonia area, in the province of Rome. The continuous search for innovative methodologies and equipment to work the famous marble has led the Company to choose the line produced by Gaspari Menotti for polishing Travertine slabs.

Morelli Group already has DGS model marble gangsaws supplied by Gaspari Menotti and decided to add the new slab polishing line which is made up of automatic trolleys specially designed for handling travertine slabs, motorized roller conveyors and an automatic Mirror M12 heads polisher.

Mirror polisher is a machine that looks to the future, entirely designed following the dictates of “**Industry 4.0**” and equipped with the latest technology in order to guarantee **very high performance**. The machine is equipped with control systems that allow you to monitor its crucial points to prevent problems and reduce maintenance costs to a minimum.

Once again, Gaspari Menotti's technology is able to meet the exigency of Companies that need **absolute quality and reliable machinery to process natural stone**.
