## SK INTERNAATIONAL STONES INDIA PVT. LTD.

reaffirms its trust in **Gaspari Menotti** by  
installing a new **multi-wire of the GMW series**

For its production capacity expansion project, **SARL Univers Marbre Granit**, based in Algiers, has confirmed its collaboration with Gaspari Menotti Technologies by again focusing on the **GMW 2000 multi-wire machine**.

It has established itself as a reliable international company in the natural stone processing sector with competency to offer Granite, Marble, Quartzite and all other natural stones to the world market. The Company has the capability to meet all customer needs in all forms such as slabs, cut to size, vanities and also to execute complete Projects.

**SK Internaational**, in order to maintain its dominant position in the market and to upgrade technology in its saw mill, chose to rely on the **multi-wire GMW** series produced by **Gaspari Menotti Technologies**. In particular, the choice fell on the GMW 2000 model, which has a cutting width of 2 metres and can cut slabs with a minimum thickness of 20 mm by installing a maximum of 71 wires with diameter 6.3 mm.

The GMW 2000 multi-wire adopts technical solutions designed to optimize the life of the wire and provide very high productivity while guaranteeing an excellent slab surface quality to facilitate high quality polishing operations. The GMW multi-wire machine is controlled by state-of-the-art electronics and has been carefully designed to keep maintenance costs to a minimum, which are among the **lowest on the world market**.

**Once again, companies that make quality, reliability and cost-effective production their strong points rely on the excellence of the Gaspari Menotti brand for state-of-the-art machines.**
