

# GMW 2000

+ SMART AND EASY + FLEXIBLE + FAST AND RELIABLE

The collaboration between  
Decolores Marmores e Granitos do Brasil and  
Gaspari Menotti Technologies

continues and is strengthened

With a view to renewing the fleet of machines intended for cutting quartzite blocks, the company **Decolores Marmores and Granitos Do Brasil** has confirmed its collaboration with Gaspari Menotti Technologies by installing another 3 multiwire machines **GMW 2000** model, each of which can work with a maximum of 71 wires diameter 6.3 mm. These machines are in addition to **the GMW 2000 installed during 2021.**

## GMW

It is a **unique machine** of its kind which, thanks to the continuous development and application of specially designed cutting-edge technological solutions, make the **GMW 2000** multiwire machine the most reliable and intuitive on the market.

The characteristics of the machine produced by Gaspari Menotti also allow it to guarantee the lowest maintenance costs among the multiwires on the market.

The multiwire of the GMW series represents the reference machine among those in its category, a position confirmed by the choice of Decolores Marmores e Granitos to which Gaspari Menotti warmly thanks for the 4 GMW 2000 multiwire machines installed.
